## Healthcare Dry Wipes

Provide an alternative to fresh linens at shower/safety stations. Multipurpose, absorbent wipes help reduce the cost and inconvenience of laundering and pilferage. **Personal Care Wipes** are soft wipes that are used for

patient care and infection control. They are disposable, so they're a more sterile and sanitary alternative to using cloth wipes. ¼-fold wipes are individually poly-wrapped to protect from contamination and moisture. White color.

Wipe Type	Material	Sheet Size	Number of Sheets	Product Brand/Series	Item No.	Pkg. Qty.
<b>¼ Fold</b>						
Personal Care Wipes	Airlaid	9 ½ in x 13 in	50	Georgia-Pacific/Pacific Blue Select	60JE02	20

## Toilet Seat Covers and Dispensers

**Toilet Seat Covers** provide a paper tissue layer between restroom visitors and the toilet for sanitary protection. Also called toilet seat liners, these disposable covers are biodegradable and flushable.

**Toilet Seat Bands** allow employees and customers to quickly identify clean toilets in hospitals and hotels. These paper bands slip easily over most sizes of toilet seats. Biodegradable paper is completely flushable.

**Dispensers** are mounted inside restroom stalls to help improve hygienic conditions for visitors by holding disposable toilet seat covers. Covers are not included where pictured.

## Door Handle Tissues and Dispensers

**Door Handle Tissues** provide a shield between clean hands and dirty door handles to help prevent exposure to germs. Tissues are typically placed in dispensers.

**Dispensers** are found in restrooms to dispense door handle tissues that are used to open the restroom door. Mount dispensers next to washroom exit doors.
