

Odor Control Information

NON-PARA CAKES/BLOCKS

Non-para or water-activated deodorizers include enzymes that break apart and dissolve with use and won't clog drains.

PARA CAKES/BLOCKS

Air-activated deodorizers are unaffected by water and melt slowly. Para blocks or rim hangers contain a chemical that's restricted for use in some states.

Urinal Screens

Non-Para

Sit on urinal drains to eliminate unwanted odors in public and commercial restrooms. Urinal screens deodorize with a fresh scent and filter debris to prevent clogged drains.

Urinal Screens with Cake

Triangular shape

Sit on the urinal drain to keep odors under control in public and commercial restrooms. Screens filter debris to help prevent drains from clogging, and the urinal cake deodorizes and freshens urinal with every flush. Pkg. of 12.

Urinal Cakes & Toilet Tank Blocks

Round shape

Urinal cakes sit at or near the drain of a urinal to maintain odor control in public and commercial restrooms. They absorb odors and leave a fresh fragrance with every flush to counteract odors.

Toilet tank blocks drop inside toilet tanks to control or eliminate odors at their source, especially in public and workplace restrooms. They are biodegradable and contain beneficial bacteria that release enzymes to help break down organic materials.

Toilet & Urinal Mats

Sized to fit and placed near urinals and around toilets to absorb drips and splashes. Mats protect restroom floors from stains, absorb odors to keep restroom smelling fresh, and keep liquids from pooling around fixtures to help prevent slips and falls. They hold up through daily cleaning and foot traffic.
