Dust Mops, Heads & Frames Definitions

Slide On

Tabs/Pockets

Hook & Loop

MOP CONNECTION TYPE:

Slide On attaches a mop head to a compatible frame by sliding the open pocket over the dust mop frame, and then securing it in place.

Tabs/Pockets insert tabs on a mop head into pockets on compatible mop frames.

Hook-and-Loop attaches soft loop strips on the mop pad to compatible stiff hook strips on the mop head.

Push In

Snap On

Threaded

FRAME HANDLE CONNECTION TYPES:

Push In frames connect to compatible handles which have spring-loaded pins that lock into matching sockets. Pinching the pins releases the handle from the frame.

Snap On frames connect to compatible snap-on handles that have a wide, flat spring-loaded clip which opens when squeezed by a user, and clips firmly onto the center wire of a dust mop frame when released.

Threaded frames connect to compatible male threaded handles, twisting securely into place.

MOP HEAD MATERIAL:

Cotton is highly absorbent and used for floor cleaning and spill pickup.

Microfiber is highly absorbent and features extremely fine fibers that trap debris, bacteria, and viruses with or without the use of chemicals.

Nylon/Polyester is a synthetic blend of materials intended to attract dirt and debris with a mild static charge while maintaining high liquid absorbency and release properties.

MOP HANDLE MATERIAL:

Fiberglass is durable and lightweight with excellent shock absorption properties and weather resistance.

Steel is strong, durable, and corrosion-resistant.

Wood is lightweight and withstands heavy-duty use. Wood is easily shaped, configured, coated, or painted for a variety of applications.

FRAME MATERIAL:

Plastic is lightweight, easy to transport, and resistant to chemicals and rust.

Metal is durable, rigid, and corrosion resistant.

Tabs/Pockets insert tabs on a mop head into pockets on compatible mop frames.

Hook-and-Loop attaches soft loop strips on the mop pad to compatible stiff hook strips on the mop head.

Dust Mops

Intended for dry-dusting floors and walls. The fibers trap dust and light debris until the head is washed or disposed of. They should not be used wet or with cleaning chemicals. Dust mops are complete kits including a handle, frame, and dust mop head. **61DR07** also includes a wringer insert and two adaptable flat mop pads.
