

## Dust Mop Heads, Frames, and Handles

**Heads** replace used or worn dust mop heads. They do not include the required frame or handle. 1TZF9 is a wedge mop replacement head.

**Frames** provide a rigid internal structure for dust mop heads, keeping them evenly stretched and maintaining good surface contact, as well as a central handle attachment point. 46D113 has a stainless steel spring mechanism for wipe attachment. 46D114 and 46D115 have plastic eyes.

**Frames with handles** replace worn or damaged handle and frame sets. The handle and frame are included and can be paired with compatible dust mop heads to create a custom dust mop system.

**Handles** are long and rigid to help prevent injury while applying pressure to the dust mop frame. Snap-on connection. They replace worn or damaged handles or attach to compatible dust mop frames and heads to create custom dust mop systems.

## Microfiber Cloths & Towels

### ■ Launderable and reusable

Small fibers trap dirt and moisture, cleaning surfaces without leaving a sticky residue or spreading dirt. Microfiber cloths are more absorbent than standard cotton cloths and don't require cleaners or chemicals. Use for general-purpose cleaning, tough jobs, and delicate surfaces. Leave no residual lint, streaks, or scratches. HYGEN medium-duty cloths, 3CCZ4 and 3CCZ3, withstand up to 500 launderings and up to 200 with bleach. Proprietary zig-zag scrubbers make cleanup quick and easy.
