Handle Dusters

Dusters attract and hold dust like a magnet to keep areas clean.

Handle dusters attach to some reusable dusters or to disposable replacement sleeves for cleaning counters, cabinets, fans, and furniture. Fixed handles are rigid for everyday dusting. Bent, flexible, and quick-connect handles add flexibility for hard-to-reach areas in offices, retail spaces, and medical centers.

Telescoping handle dusters include an extendable handle to reach overhead areas including tops of cabinets, crown molding, ceiling fans, air vents, and light fixtures.

Disposable Dusting Sheets and Holders

Soft, non-scratching **disposable dusting sheets** trap dirt, dust, and sand during hand, floor, or high surface dusting.

Perforated hand dusting sheets also attach to sheet holders with handles to extend reach. Disposable sheets eliminate laundering time and expense. Dusting sheets clean and dust multiple surfaces in schools, offices, hotels, and medical facilities.

Holders for disposable dusting sheets use both sides of disposable sheets for dusting furniture, floors, corners, and tight spaces in hotels, hospitals, schools, and retail spaces. They can be attached to a threaded handle to extend reach. Features hook and loop connection system; works with standard threaded broom handle. See page 1486. Reusable.

Dusting Mitts

Mitts are ambidextrous and worn over a single hand for removing dust from crevices and surfaces including cabinets, shelves, and furniture. Reusable mitts won't leave residual lint, streaks, or scratches on even the most delicate surfaces.
