Tube, Pipe, and Fitting Brushes

Tube brushes are small diameter brushes with stiff bristles that clean short pipes, tubing, and hard-to-reach spots inside elbows, tees, and valves. **Pipe exterior brushes** are curved for removing dirt and debris from curved drains, tubes, pipes, equipment, and the outside of pipes. Durable bristles are twisted into steel wire for use in kitchens, food processing, and manufacturing. **Fitting brushes** debur, polish, and clean the inner bores of tubing, machined cylinders, flat stock, and smooth or threaded blind holes. These brushes help remove sharp edges from pipe, tubing lines, and small drains and openings. Stiff wire bristles improve electrical contact in light sockets. **Bore brush sets** include multiple brush diameters to clean a variety of gun barrels and calibers. Stiff wire bristles loosen the soot and residue that build up inside gun barrels. **Pipe and tube brush heads** replace broken or worn heads on existing pipe and tube brushes. They have durable bristles and attach to multiple handle types. **Tube brush handles** replace broken or worn handles on existing tube brushes. They are flexible and may add extended reach in narrow spaces.

Toilet Brushes

Toilet brushes scrub the toilet bowl and under the toilet rim to remove grime and prevent lime scale buildup. Durable, lightweight brushes keep toilets clean in hospitals, schools, and businesses. **8YE67** includes (2) swab heads. **1NFG8** is specifically for correctional and mental health facilities; safe for extreme environments. **2U289** has a no-leak, self-wringing cone to remove excess liquids.

Toilet brushes with caddies store the brush between uses and keep drips contained. **5PE64** includes (2) bristle brush heads. **801W60** has a white caddy, **801W61** has a black caddy. **Toilet brush caddy** holds (1) toilet mop or brush and (1) 32-oz. bottle of toilet bowl cleaner with a friction-fit open band. Hinged lid hides mop, compartment contains drips and other contaminants.
