Bleach

Liquid bleach is commonly used to deodorize and disinfect hard, nonporous surfaces to eliminate germs, mold, odors, and a broad range of pathogens, including bacteria, fungi, and viruses. The surfaces should be cleaned with soaps or detergents before applying bleach. Diluted bleach can also be used to whiten and brighten fabrics during laundering. Germicidal bleach is more concentrated than standard bleach, so less product is needed to create a solution for disinfecting surfaces.

Description	Container Size	Ready to Use/ Concentrated	Fragrance	VOC Content	EPA Registered	NSF Rating	Product Series	Brand	Item No.	Pkg. Qty.

Disinfectants

■ All are EPA registered

Apply liquid and foam disinfectants after cleaning hard, nonporous surfaces to reduce the risk of spreading infection.
