

### 3M DUMOND Graffiti Removers

Ready-to-use removers effectively clean up paint, permanent marker, ink, crayon, and adhesive from multiple hard surfaces. 6KHD7 and 6UAX9 are aerosols with a thick gelled formula that clings to vertical surfaces. Wipes are premoistened and offer an efficient alternative to using multiple items, such as rags, buckets, and spray bottles.

Container Type	Container/Sheet Size	Fragrance	Brand	Item No.	Pkg. Qty.

\* These removers leave a protective layer to control the growth of mold and mildew.

### Mold & Mildew Removers

Removers seep into porous surfaces to remove embedded fungal spores and prevent future damage by inhibiting growth and stopping airborne spore transmission.

### Mold Control Fogger Machine

This electric machine uses liquid oil- or water-based mold control products to saturate the air in enclosed spaces or small rooms to kill airborne and surface-based mold spores. It dispenses a fog that coats surfaces including walls and ceilings to kill mold spores and prevent future growth.

Mold control chemicals work with the fogger to eliminate and prevent mold and mildew. No rinse required, nonflammable, and plastic safe. VOC content is 0%. Ready to use.
