## Mop Bucket/Wringer Combos

### TANDEM

All-in-one compact design with integrated bucket and wringer provides effective wringing and no lost parts. 31-qt. bucket has a down pressure wringer and accepts up to 24-oz. mops.

### NEW GENERATION WAVEBRAKE BUCKET/WRINGER COMBOS

Patented mop bucket system helps prevent workplace hazards associated with spills and splashes. Color-coding on Bucket/Wringer Combos helps reduce cross-contamination. Organize by function, department, or building area. WaveBrake baffles reduce splashing while mopping and maneuvering for a safer environment. Molded-in pour spout and sink ledge help direct water while emptying

the mop bucket. Improved wringer design works with more mop sizes, extra small to extra large (12- to 32-oz.). Built-in steel handle provides a secure grip to lift and carry the bucket. Red handle at back of mop bucket helps lift, carry, and empty the bucket. Structural web-molded plastic construction. 493G96 includes a foot-operated drain in front of bucket to empty into floor drains.

### NEW GENERATION WAVEBRAKE BUILD YOUR OWN BUCKET COMPONENTS

Individual components and colors are available to build a cleaning system that meets your specific needs.

Note: New Generation WaveBrake wringers, replacement buckets, and dirty water buckets will not fit on pre-September 2018 mop buckets.

## Institutional Mop Bucket and Wringer Combo

Designed for use in correctional and institutional applications—virtually all-plastic, metal-free design reduces the ability for making weapons. Features quiet-rolling 3" nonmarking casters. Wave baffles result in less splashing while mopping and maneuvering. Molded-in handles, sink ledge and a pour spout provide control to ensure a safe and stable emptying process.
