Base Type

Bases are the liquid foundations created for mixing colors or tints into paints or primers.

Solvent-Based—Spray paints and primers adhere better than water bases in very hot, humid or extreme temperatures.

Water-Based—Used for interior areas or in places where proper ventilation is lacking.

Fabric & Vinyl Spray Paints

■ Solvent base

Contain permanent, colorful dyes to change appearance and improve condition of indoor or outdoor furniture. They can be used on any water-absorbing materials and leave behind a soft, dry surface.

4YLD6

Compatible Surface Material	Sheen	Color	Container Size	Coverage Area	Dry Time	Dry Time to Recoat	Item No.
Fabric, Vinyl	Flat	Black	11 oz	12 sq ft	24 hr	1 hr	4YLD6
	Gloss	Black	11 oz	12 sq ft	24 hr	1 hr	4YLD5

Chalk Board Spray Paint

■ Solvent base

Turn any hard, flat surface into a writeable chalkboard. Paint sprays dry to a solid matte finish and contains high qualities of talc and silicone to make the surface last longer and remain erasable.

Compatible Surface Material	Sheen	Finish Texture	Color	Container Size	Coverage Area	Coating Application	Dry Time	Dry Time to Recoat	Item No.
Cardboard, Ceramic, Concrete, Drywall, Fabric, Fiberglass, Glass, Leather, Masonry, Metal, Paper, Plaster, Plastic, Rubber, Steel, Styrofoam, Vinyl, Wood	Flat	Smooth	Black	16 oz	18 sq ft	General Purpose Spray Paint	15 min	4 to 24 hr	54TJ63

Wall Textured Spray Patch Paint

■ White

Cover cracks and chips in drywall, ceilings and concrete. These sprays are also decorative, imparting a gritty or sandy texture to a surface. Textured sprays can be used along with sealers to create non-slip surfaces.
