

## Dust Barrier Doors & Panels

### ■ Plastic material

Heavy-duty plastic doors zip open and close along doorways leading to construction zones. They come in various sizes to accommodate single and double door entries.

W	H	Color	Includes	Mfr. Model	Item No.
<b>Door</b>					
4 ft	7.5 ft	Clear	(2) Flap Hooks, Roll of Tape, Zippered Door	ZDS	32V060

## Wall Barrier Sheeting Films

### ■ Polyethylene material, except 2GJJ8 is plastic

Film are heavy-duty clear film placed on walls or doorways during construction or large-scale painting operations. It is taped in place and peels off for easy removal.

**General Purpose**—A medium-thickness and used in interior wall coverage.

**Reinforced Tear Resistant**—Heavy-duty or double-ply barrier film is used as temporary coverage and prevents dust, dirt, and chemical fumes from moving between rooms and spaces. Used in hospitals and care centers, the film is also used as a room divider to keep contaminants from spreading.

**Fire Retardant**—Films resist sparks and flames from electric tools, and absorb fire and extinguish any flame before it starts where welding and soldering occur.
