Hard Surface Protection Rolls

Plastic & Rubber—Protector sheets safeguard existing flooring from damage during painting or construction, and is useful when working in rainy or snowy weather or when water is nearby. The film stops moisture from leaking into the substrate.

Kraft Paper—A heavy multi-use paper made of recycled material. Can be dispensed from a stand (sold separately) so that the required amount can be torn from the roll and laid on flat surfaces to guard against paint drip and construction dust. It can also be used to wrap or layer between items, or to fill excess space inside packages, preventing items from shifting during transit.

Rosin Paper—Bleed-proof paper rolls are an economical protective covering for floors or carpets. These multi-use rolls may be spread and taped over any flat surface to stop dust or paint splatter from ruining the surface underneath.

Non-Woven Fiber—These synthetic fiber and plastic protection rolls are anti-slip for use in heavy foot-traffic areas like hallways and entryways. They repel water and absorb paint drips without bleeding through.

Standard Window Protection Films

- Polyethylene material
- Adhesive backed
- 1.5 mil thickness

Film is sold by window size and tapes in place inside the window frame. These films prevent painters from having to clean or scrape windows after painting trim or ceilings.

W	L	Color	Item No.
24 in	250 ft	Blue	10CS48
36 in	250 ft	Clear	10CS47
24 in	600 ft	Blue	10CS46

Plasticover

Standard Countertop Protection Films

- 3 mil thickness
- Polyethylene

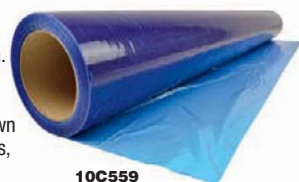

Films are sized to fit standard kitchen countertops of 24 inches, and adhere directly to countertops to protect them from damage and paint spills. The films are tinted green or blue to easily see paint or dust on the surface.

W	L	Color	Adhesive Backing	Recyclable	Brand	Item No.
24 in	200 ft	Green	Non-Adhesive	Yes	Surface Shields	22DM45
	500 ft	Green	Non-Adhesive	Yes	Surface Shields	22DM46

36 in	250 ft	Green	Non-Adhesive	Yes	Surface Shields	22DM47
	500 ft	Green	Non-Adhesive	Yes	Surface Shields	22DM48

HVAC Duct & Register Plastic Sheeting Protection Rolls

- 3 mil thickness
- Recyclable

Adhesive-backed plastic films seal off ductwork during painting or construction. The edges have a highly adhesive glue to hold them in place without slipping, eliminating the need for taping them down or extra adhesive. The film prevents drips, dust, or construction debris from getting into ducts or pipes.

W	L	Color	Material	Item No.
24 in	200 ft	Blue	LDPE	10CS58
36 in	200 ft	Blue	LDPE	10CS59

TRIMACO

Plastic Toilet & Surface Sheets

Plastic Toilet Covers—Offer quick and easy protection for toilets during painting or construction. The covers are edged with elastic to ensure a tight fit that won't slip and don't need to be taped down to hold. Reusable.

PVC Surface Sheets—These ground shields are waterproof and reusable, and used in heavy-traffic painting or construction applications. They protect surfaces from damage and help reduce cleanup time.
