- To choose your "Marking Tool Surface Material" go to Grainger.com, enter "Item No." and use the filter on the left side.

CROSS CHECK—Highly visible marks indicate loose nuts, bolts, fasteners, and assemblies. Color can be viewed in ambient, fluorescent, and ultraviolet light.

CROSS CHECK Plus—Provides enhanced visibility in aviation maintenance applications.

HIGH PURITY 44—Valve-action tip allows tip to be re-inked. For surfaces where degradation or contamination is a concern.

HIGH TEMP 44—For marking surfaces exposed to high temperatures. Valve-action tip allows tip to be re-inked.

SAFE-MARK—NSF Certified for marking food contact surfaces used in processing, transporting, or holding food products. Valve-actuated locked nib tip.

TEXPEN—Stainless steel ball tip allows medium and broad marks and writes through grease, oil, and underwater.

TUFF GUY—Makes clear, crisp marks and is resistant to most coolants and cutting fluids, degreasing baths, and other industrial chemicals.

Silver-Streak

Markal Industrial Markers

DURA-INK 5—Extended micro tip is for marking through drill holes, mounting brackets, and hard-to-reach areas. For use on cardboard, fabric, glass, metal, plastic, and wood.

DURA-INK 15—Fine bullet tip is good for layout work and parts identification. Works well on cardboard, fabric, glass, metal, plastic, and wood.

DURA-INK 55—Chisel tip produces fine and broad markings. For use on cardboard, glass, metal, plastic, and wood.

DURA-INK 80—Valve-actuated tip provides on-demand ink for smooth, continuous use. For use on cardboard, fabric, glass, metal, plastic, and wood.

DURA-INK WashAway—For temporary markings and removes easily with dry rag, towel, or eraser. Use on metals and glass.

Red-Riter and Silver-Streak—Create torch-resistant markings that will not rub, burn, or blow off. For metal layout and fabrication.
