Bagged, Corded Backpack Vacuums

■ Dry pickup

Vacuums trap dirt, dust, and allergens. Debris is contained for disposal to help prevent recirculation of dust and allergens, making them a common choice for vacuuming in healthcare and educational settings.

Bagless, Cordless Backpack Vacuums

■ Dry pickup

18V, M18 FUEL series vacuums rest on your back and operate without the limitations of a power cord to collect dirt and debris in your dirt cup or chamber for disposal. The chamber also allows small items to be recovered from the collected debris. Vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor. Brushless motor has the suction power to clean up drywall dust, concrete dust, and wood/metal shavings.
