### Electric Drum-Top Corded Vacuum Heads

Drum-top vacuum heads have an electric motor for connecting to an electric power source. They generate strong suction to draw wet or dry materials into an attached 55-gallon drum (5ERH2 sold separately on page 1135).

Vacuum Pickup Type	Vacuum Hose Dia.	Vacuum Air Flow	Peak HP	Static Pressure	Brand	Mfr. Model	Item No.
<b>Standard Filtration</b>							
Wet/Dry	1 1/2 in	88 cfm	3 hp	84 in	Dayton	61HV93	61HV93
Wet/Dry	2 in	243 cfm	2 1/4 hp	100 in	Tornado	98698	35PG51
Wet	1 1/2 in	114 cfm	6 1/2 hp	120 in	Dustless Technologies	H0901	48GP71

### Pneumatic Drum-Top Vacuum Heads

Vacuum heads operate on a compressed-air supply, so they have no electric motor to burn out and no moving parts to wear out. They're commonly used in wet environments where an electric-powered vacuum could be hazardous. They generate strong suction to draw wet or dry materials into an attached 55-gallon drum. Designed for flood control, sludge pickup, and cleaning of sumps and coolant tanks.

Note: All air vacuums come with a 3/16" jet installed. 1/32" and 1/4" jets are also supplied.

### Bagged, Corded Handheld Vacuums

▪ Dry pickup Vacuums trap dirt, dust, and allergens in replaceable bags that are discarded when full. They keep debris contained for disposal to help prevent recirculation of dust and allergens.

### Bagged, Cordless Handheld Vacuum

Vacuum operates without the limitations of a power cord to trap dirt, dust, and allergens in replaceable bags that are discarded when full. The bags keep debris contained for disposal to help prevent recirculation of dust and allergens.

	Battery Charger							BC660	30RW48	

### Bagless, Cordless Handheld Vacuums

Vacuums operate without power cord restrictions to collect dust and debris from small cleaning jobs in their dirt cup for disposal. The dirt cup can be cleared out when full to prevent reduced suction or an overheated motor and also allows small items to be recovered from the collected debris. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor.
