

Find more information on Hearing Protection on page 1578.

Flanged-Shaped Ear Plugs

Reusable

Multiple, tapered fins that flex to provide a comfortable, yet snug fit in the ear canal. Fins also create pockets of air to help block out noise.

Pod-Shaped Ear Plugs

Disposable

Large, ball-shaped end fills the ear canal, and a paddle-shaped handle provides a grip for pushing the pod into place so there's no need to touch or roll the ear plug. A good choice for use in dirty environments.

Banded Ear Plugs

Reusable band with disposable tips

Ideal for intermittent use when switching between noisy and quiet areas. Less bulky than ear muffs and more convenient than individual ear plugs, they protect hearing where high levels of noise reduction aren't needed. Reusable band holds replaceable tips in place and allows them to be more easily inserted and removed than standard ear plugs. Band can be worn over the head, under the chin, or behind the neck; it can also rest around the neck when plugs aren't in use.
