## Supplied Air System Components

Easily build a supplied air respirator system. Just choose headgear, a breathing tube, and an air source that fits your needs.

Note: Headgear, breathing tube, air control valve, and compressed air supply hoses are required parts of a NIOSH-approved system.

### HEADGEAR AND ACCESSORIES

**Versaflo M- and S-Series Headgear and Accessories**—Compact, lightweight, and easy to maintain while helping protect the wearer from a range of hazards. Versatility, comfort, and ease of use make this headgear suitable for a variety of applications.

**H-Series Hood and Accessories**—Can be easily worn with limited facial hair or eyewear.

- Hood assembly meets ANSI Class 1, Class E requirements for industrial headgear

### SUPPLIED AIR CONTROL, HOSES, AND FILTRATION

**V-Series Air Control Devices**—The devices are designed to provide a continuous air flow. For enhanced wearer comfort, 4YG10 (cool) and 1CGB7 (warm) allow the compressed air supply temperature to be adjusted up to 50°F.

**Supplied Air Hoses**—Combine up to 3 high-pressure hoses in any combination not to exceed 300 ft. Low-pressure hoses can only be used in single increments of 50 or 100 ft.

**Compressed Air Filter and Regulating Panel**—Helps filter and regulate compressed air.

<b>Compressed Air Filter and Regulating Panel</b>		
50 cfm @ 105 psi Max. Capacity	W-2806	1BC35

\* Use with any 3M Versaflo system

## Versaflo Painters Supplied Air Respirator Kit

Painter's supplied air respirator kit includes 11V993 (M-105) respiratory faceshield with lens covers, 4YG10 (V-100) Vortex Cooling Assembly, and 5WZA7 (BT-20L) Breathing Tube with cover. A high-pressure supplied air hose, sold separately on this page, is required to complete a NIOSH-approved system.
