**WOOSTER**  
**Dual Paint Roller Frame**

Frame features twin roller cages that spin smoothly and paint 2 sides of pipe simultaneously. Roller frame is fully adjustable to paint pipes as small as 1" dia., as well as railings, posts, I-beams, bridges, and more. Galvanized 1/4" shanks.

| Roller Length      | Overall Length | Roller Frame Style | Handle Material | Handle Color | Paint Type | Item No. |
|--------------------|----------------|--------------------|-----------------|--------------|------------|----------|
| 4 1/2 in, 6 1/2 in | 10 in          | Cage               | Plastic         | Green        | All Paints | 21YX76   |

**WOOSTER** **Premier**  
**Purdy**

**Adjustable Paint Roller Frames**

Accommodate any size roller cover up to 18 in. long. These heavy-duty frames have two end caps to hold the larger covers in place while rolling.

| Roller Length | Overall Length | Roller Frame Style | Handle Material | Handle Color | Handle Type | Paint Type                     | Brand   | Item No. |
|---------------|----------------|--------------------|-----------------|--------------|-------------|--------------------------------|---------|----------|
| 12 to 18 in   | 6 1/4"         | Yoke               | Nylon           | Green        | Threaded    | All Paints                     | Wooster | 22HR5    |

**WAGNER**  
**Paint Power Rollers**

■ For use with latex and oil based paints

**Electric Paint Power Roller System**—Include a motor or pump that propels paint from the container to the roller through a hollow tube. The paint reaches the roller and is evenly distributed over the flat surface through tiny pores on the roller cover and saturates the roller wool.

**Manual Paint Power Rollers**—Include a draw tube that pulls paint into the handle of the roller and feeds it to the roller cover for extended painting times. The tube will refill the pole as many times as necessary, helping to speed painting procedures, eliminating drips and spills, and providing even coverage to any flat surface being painted.

| Roller Length                                   | Handle Length | Overall Length | Cap.     | Item No. |

**Paint Roller Poles**

■ Universal connection

**Adjustable** poles attach to the base of roller frame handles and adjust to increase reach for painting in high areas or on ceilings, reducing the amount of ladder work needed on a job. Poles feature a twist-locking mechanism to hold in place. **Nonadjustable** paint extension poles are stationary sticks with threaded heads, resembling broomsticks. Paint roller frames screw onto the threaded heads and hold paint rollers steady to reach short or moderate heights.

| Pole Length                                | Dia.    | Material                                   | Color        | Brand   | Item No. |
