Paint Applicator Combination Kits

Combination kits for paint applicators provide the basic tools needed to complete a painting or staining project in one kit, and are often less expensive than buying multiple single items.

Roller Length	Nap Size	Cover Material	Roller Frame Style	Surface Material	Surface Type	Paint Type	Number of Pieces Included	Brand	Item No.

Paint & Stain Edger
12G323

Paint Edgers & Pads

Paint & Stain Edgers create clean, straight lines of paint along molding and trim without using painter's tape. These tools use disposable pads to spread paint alongside areas that are not intended for paint. They provide better control and less splatter than paint brushes, making them faster to use when cutting edges around ceilings, windows, doors, and in corners. **Refill Pads** replace old, worn pads to help ensure smooth, even paint coverage.

Staining Cloths & Paint Mitts

Staining Cloths are cotton cheesecloth squares used for staining or varnishing wood surfaces. Since cloths are thin and pliable, they saturate quickly to fill wood grain and cover surfaces smoothly.

Paint Mitts are multi-layered, lined gloves that provide protection while applying paint or stain in hard-to-reach areas or on irregular surfaces.

Overall Length	Overall Width	Material	For Use With	Color	Brand	Item No.	Pkg. Qty.
Staining Cloths
