## Electrostatic Dissipative (ESD) Gloves

Made of conductive fibers to prevent the buildup of static electricity that can damage sensitive electronic equipment. Use for electrical component assembly, and in telecommunication and electronics industry applications.

**G6631** are uncoated for better dexterity and breathability.

**G6632** have a polyurethane coating to provide a firmer grip.

**D1641** have a polyurethane coating on palms and fingertips. Copper-based Thunderon liner.

**F0634** have a nitrile foam coating for abrasion resistance as well as an antimicrobial liner and coating.

## Finger Cots

- Thickness: 3 mil
- Length: 2¾"
- Rolled cuff

**3RZR9**

Provide excellent sensitivity while preventing contamination when handling small items and parts. Powdered cots are easier to don and can be used where particulate contamination is not a concern. Use powder-free cots when particulate contamination is a concern. Dispenser with hinged lid offers easy access.
