

Find Glove sizing information on page 1619; Cut and Abrasion Resistance information on page 1627.

## Cut-Resistant Gloves for Food Processing Environments

Midweight gloves offer puncture, cut, and abrasion resistance for a variety of food processing tasks. Polyester-stitched liner is high-performance polyethylene (HPPE) and glass fiber. Strong HPPE/fiberglass palm has a sensitive touch for detailed work.

## Cut-Resistant Gloves for Food Processing Environments

- Dyneema lining
- Sold individually

Gloves are designed for comfort and dexterity while using knives, blades, and utensils in food processing applications. Dyneema polyethylene fibers used to construct gloves are superstrong, lightweight, and extremely moisture/UV/chemical resistant.

**SafeKnit**—High-strength fibers offer superior comfort and flexibility and a high level of cut resistance in heavy-duty applications. Ambidextrous.

**PolarBear**—G9436 lightweight knit gloves provide comfortable protection for wearers working with sharp blades.

G9432 PolarBear Supreme gloves employ a blend of fibers and advanced knitting method to incorporate strands of stainless steel for extremely high cut protection.

- FDA compliant for food handling

**PawGuard**—Medium-duty glove provides a close, comfortable fit and the cut protection of a heavyweight glove. Good for most knife-hand and some off-hand applications.

- FDA compliant for food handling

**VersaTouch**—Knitted variable-stitch design adjusts to the shape of the hand to reduce fatigue and enhance cut protection. Exclusive materials manage moisture and hand temperature in hot and cold environments for high levels of comfort as well as cut protection. Designed with Dyneema Diamond Technology to deliver excellent dexterity.

- FDA compliant for food handling

## Chainmail Cut-Resistant Gloves

- Stainless steel
- Ambidextrous
- Sold individually

Protect against extreme cut hazards in applications such as food preparation, butchering operations, and knife sharpening and cleaning. Puncture-resistant stainless steel mesh can be sanitized to eliminate the growth of bacteria. Cuffs are color-coded by size, for easy identification.

**Condor gloves** have a nylon strap at the wrist to securely hold glove.

**Niriflex gloves** have a stainless steel cuff with a stainless steel clip closure.
