Cold-Condition Insulated Mechanic's Gloves

- Thinsulate insulation keeps hands warm in extreme conditions

RINGERS GLOVES

Insulated thermal gloves combine a water-proof barrier and impact protection to provide maximum comfort and protection in the most demanding environments. Developed with Ringers' F3 Technology for superior dexterity and employ tough TPR impact protection. Touchscreen compatible index, middle and thumb tips.

Super Hero—Medium-duty gloves have added palm PVC patches. Extended cuff with gaiter closure.

Zero—Heavy-duty gloves have a silicone dot palm with PVC grip patch system, providing excellent protection and grip under any

conditions. Gaiter closure increases safety and security.

Roughneck—Heavy-duty gloves with synthetic leather palm and grip patch system. Extended neoprene wrist closure with TPR pull tab.

Sub-Zero—Heavy-duty gloves have leather 2-layer palm with PVC grip patch system. Gaiter closure increases safety and security.

MCR SAFETY

Waterproof/windproof barrier and hi-vis snow/water resistant back-of-hand fabric keep hands warm and dry. Inner elastic snow/ice cuff keeps moisture out. MAXGrid material on the palm provides firm grip in dry, wet, and oily conditions. Touchscreen friendly fingertips.

Cold-Condition Coated Gloves

ActivArm 23-173 and 23-193 gloves are fully coated with a durable, abrasion-resistant PVC coating that repels water, oil, and grease, while remaining flexible at low temperatures. Foam insulation ensures hands stay warm and dry. Meet EN 511-111 contact cold standards.

ActivArm 97-681 gloves have a PVC foam coating that remains flexible in temperatures as low as -25°C/-15°F. RIPEL Technology liquid-repellent surface barrier makes them fully waterproof. 2-layer construction combines a PVC-coated nylon exterior with a soft acrylic interior, for comfort and warmth.

NATIONAL SAFETY APPAREL®

Cryogenic Gloves

- Meet EN 511 standard
- Sold by the pair

Gloves provide excellent thermal protection for hands and arms in ultracold environments (-260° to -300°F) and cryogenic atmospheres. SaferGrip gloves feature silicone-coated material in the palm for enhanced grip and durability. 100% Waterproof gloves provide additional protection against cryogenic splashes. Not intended for immersion in liquid cryogenics.

Note: Cryogenic aprons are offered on page 1682.
