**Baseball-Style Bump Caps**

- Hook-and-loop adjustment
- Inner ABS shell

Combine a traditional baseball cap over a bump cap insert. Worn by contractors, exterminators, and other workers who might bump into stationary objects such as beams or piping. Not ANSI rated and are not suitable for applications that require an ANSI-rated hard hat.

**Traditional-Style Bump Caps**

- Available in blue, green, orange, red, white, and yellow; high-visibility and other colors, see Grainger.com
- Polyethylene
- Pinlock suspension

Protect workers from minor injuries caused by bumping into a stationary object. Worn by workers in confined spaces, crawl spaces, or near overhead piping. Resemble a traditional hard hat and are made of plastic so they can be used in food manufacturing. Not ANSI rated and are not suitable for applications that require an ANSI-rated hard hat.

**Hard Hat and Helmet Suspensions**

- Suspension brand and helmet brand must be the same

Suspensions are the part of the hard hat or helmet that rests on the wearer's head. They provide a gap between the headgear and head, which helps absorb shock and redirect impact force away from the head and spine. Suspensions should be replaced yearly as part of normal maintenance and inspection practices, or earlier if the suspension shows signs of wear.
