Metal-Detectable Ear Plugs

■ Disposable; except Flanged and Pod Shape are reusable
Include metallic components that can be sensed by a metal detector. Commonly worn by workers in food manufacturing and pharmaceutical processing plants so that ear plugs lost on the production line can be easily found, to help prevent contamination of products.

Plugs expand within the ear to form a seal that reduces sound levels and helps prevent hearing loss in noisy work environments. Corded to help keep them from falling off, and allow them to rest around your neck when not in use.
Note: For more information on plug shapes, see page 1643.

Metal-Detectable Ear Plug Dispensing System

Convenient all-in-one unit consists of a disposable dispenser, prefilled with a supply of metal-detectable ear plugs. Dispenses ear plugs one or two at a time to minimize waste and supply clean plugs for each user. Throw out the container when empty to eliminate the hassle of refilling. Dispenser must be wall mounted with the included bracket. Once installed, the bracket can be reused with replacement Moldex dispensers.
