

### Communication Ear Muffs

Two-way communication headsets with noise-canceling microphone allow users to clearly deliver and receive messages even when surrounded by high levels of noise. Built-in programmable two-way radio and bluetooth technology for easy wireless connection. Include rechargeable Li-Ion battery and charger.

### Impulse Noise Protection Ear Muffs

Electronically filter out constant, loud noise and short bursts of high-volume noise. Electronic hearing protection ear muffs reduce, or attenuate, loud noises while still allowing you to hear ambient sound. Often worn to protect against impulse (or impact) noises such as gunfire or metal stamping, pressing, and forging sounds.

### Replacement Pad Kits for Ear Muffs

Kits extend the life and restore the performance of ear muffs by replacing worn or lost ear cup pads. Can also be used to supply clean pads for a new user. New pads optimize hearing protection by maintaining a proper seal around the ears.
