

Carbonized-Fiber Flame-Resistant Clothing

Carbonized fiber provides the best protection available as a single-layer garment. Performs better than traditional flame-retardant cotton material.

Jacket—Lightweight modern design with adjustable stand-up mandarin collar and a relaxed full-cut fit and elongated front for greater freedom of movement. Breathable and washable. With 2 pockets. Large inside pocket and snap front closure. Nomex sewn.

Bib-Style Apron—Combines heavy-duty protection and durability with lightweight comfort and dexterity. Sewn with Nomex thread. Features neck strap and adjustable waist straps.

Sleeves—Knit sleeves 4FRT5 and 4FRT6 significantly increase thermal protection in high-heat applications. Woven sleeves 4FRT1 to 4FRT4 protect from sparks, splatter, and flame in light to medium welding applications.

Flame-Retardant Cotton Welding Coveralls

Provide protection from light sparks with continuous coverage that prevents gaps at the waist when moving or bending. Relaxed design allows coveralls to be worn over work clothing for a comfortable fit. Weldlite fabric can maintain flame resistance for up to 50 home washings or 25 commercial washings. Include an inside chest pocket, 2 rear patch pockets, and 2 front swing pockets with side slits for access to pants pockets. Snap front closure. Suitable for use in light welding applications.
