TINGLEY**Flame-Resistant Rainwear**

- Meets ASTM D6413

Safetyflex—Specialty PVC on polyester material is durable, mildew resistant, and provides a comfortable fit. Fabric is chemical resistant to many acids, alcohols, alkalis, oils, and salts, while the Therm-O-Rad sealed seams provide you 100% liquidproof protection. The jacket features full cut shoulders with 90° sleeve to body angle for supreme freedom of movement, an attached hood, and a storm fly front to seal out rain, wind, and contaminants. The tapered sleeves can fit in protective gloves and can accommodate glove rings for additional safety. Overalls have a plain front and feature a stitch bonded, non-woven lining that resists tears, punctures, and dissipates

moisture. Suspenders have a snap lock buckle for easy adjustments. Snap closures are heavy-duty for long life.

Magnaprene—Nylon fabric is coated with neoprene for abrasion and mildew resistance, and to protect against acids, chemicals, oils, and solvents. The stitched and taped seams offer 100% waterproof protection. Jacket features batwing sleeve construction for maximum freedom of movement and take-up snaps on the sleeves for an adjustable fit. Comfortable corduroy tip collar and a storm fly front that helps seal out rain, wind, and contaminants. Pants have take-up snaps on the ankle cuffs for an adjustable fit and heavy duty snaps for long life.

TINGLEY**High-Visibility Arc-Flash and Flame-Resistant Rainwear**

- 2" silver reflective tape
- Jackets and Coats are Type R Class 3
- Bib Overalls are Class E

Eclipse Quad-Hazard rainwear features Thermo-Grid technology to block out heat energy, while the flame resistant PVC coating on Nomex provides 100% liquid proof protection. Ideal for use in all electric and gas utilities, power generation, pipeline and construction work, as well as in petrochemical applications. Resistant to many acids, oils, alcohols, salts, and alkalis.

Jackets and Coats—High-visibility, liquid-proof coats provide excellent arc flash protection and have an overhead shoulder design to let you do overhead work without limiting your range of motion. The zipper/storm fly front has a snap closure and hidden

non-conductive, non-corrosive hardware to seal out heat, wind, rain, and contaminants, while hook and loop take-up straps on wrists help assure an adjustable fit. D-ring access lets you attach a fall protection harness. Also feature a flame-resistant corduroy collar with rollaway hood and a full-vented cape back for improved air circulation.

Jackets J2556 and J2557 also provide flash fire protection, and have an adjustable elastic drawcord.

Bib Overalls—Snap fly front overalls feature Quad-Hazard high-visibility, liquid proof, arc flash, and flash fire protection. Suspenders have heavy-duty non-conductive quick-release buckles and crossovers, while the hook-and-loop take-up straps on ankle cuffs provide an adjustable fit and help seal out contaminants.

**High-Visibility Arc- and Flame-Resistant Rainwear**

- Meets ANSI/ISEA 107
- Jackets are Type R Class 3 Level 2
- Overalls are Class E

Features 3M 2" high-visibility reflective trim and welded seams.

ArcLite—Provides protection in telecommunications and electric utility environments. Lightweight, flexible Nomex with FR polyurethane/PVC barrier minimizes heat transfer burns and has limited chemical splash resistance.

- Meets ASTM F1891

Sentinel—Durable, flexible 100% FR cotton knit with FR polyurethane barrier minimizes heat transfer burns and provides resistance to chemical splashes. Protects from oils, hydrocarbons, salts, and alcohols in electric and gas utility environments and refineries.

- Meets ASTM F1891 and F2733
