

Particulate & Liquid Protective Boot & Shoe Covers

These boot and shoe covers are worn over personal footwear to protect surfaces from contaminants and protect footwear from damage.

Non-Hazardous or Hazardous Dry Particulates—For use when working with non-hazardous or hazardous dry particulates larger in size than aerosols and include dust and dirt.

Non-Hazardous Liquid Splash/Spray—Use when working with non-hazardous liquid splash and spray. Splash is non-pressurized or lightly pressurized when it contacts a garment while spray is pressurized.

Bloodborne Pathogen Resistance for Non-Hazardous Dry Particulates and Non-Hazardous Liquid Splash—Help protect from bloodborne pathogens (such as hepatitis), non-hazardous dry particulates (larger in size than aerosols and include dust and dirt), and non-hazardous liquid splash (non-pressurized or lightly pressurized when it contacts a garment while spray is pressurized).

Chemical Protective Boot & Shoe Covers & Shrouds

Help protect workers and footwear from hazardous dry particulates, larger in size than aerosols and include dust and dirt. Also provide moderate-chemical splash and spray protection from organic and inorganic acids and bases, solvents, and salts found in industrial cleaning applications. **Boot and Shoe Covers** are worn over personal footwear and protect it from incidental contact with hazardous and non-hazardous substances. **Boot Shrouds** cover the opening at the top of the boot to prevent liquids and other materials from falling into the boot.

Cover Material	Height Range	Includes Slip Resistant Sole	Color	Size	Item No.	Pkg. Qty.
Boot & Shoe Covers for Hazardous Dry Particulates & Moderate Chemical Splash/Spray
