Disposable Protective Clothing

TYVEK 400

Fabric is comfortable and lightweight while providing puncture- and tear-resistant protection in wet or dry applications without restricting movement when stretching and bending. Offers inherent barrier to particles down to 1 micron even after abrasion. Coveralls meet OSHA requirements for asbestos and lead abatement.

TYVEK 400D

Fabric offers the high protection of Tyvek on the front of the garment, while the back is made from highly breathable DuPont ProShield fabric to increase breathability and help reduce heat stress. Thumb loops on sleeve ends and elastic waists help keep garments in place when donning gloves and performing strenuous activities. Excellent for use in demanding applications that have limited frontal exposure to hazardous particles and liquid splash. Both fabrics are low-linting with antistatic properties. White front and blue back.

Coveralls—Zipper-front coveralls with comfort fit design for greater range of movement.

Collared Shirts—Long-sleeve shirt with 4 plastic snaps and serged seams.

Pants—Feature elastic waistband and serged seams.

Collared Lab Coats—Feature 5-snap front with a storm flap, serged seams, and set-in sleeves that allow greater freedom of movement.

Pullover Hood—Elastic opening hood features serged seams and is shoulder-length to offer greater coverage.

Bib-Style Apron—Provides full front coverage and features bound neck with long ties and bound seams.

Sleeves—Feature serged seams.

Shoe/Boot Covers—Feature serged seams. Skid-resistant 6LY43 and 4LUR4 prevent slipping.
