## Tychem 10000 Encapsulated Suits

- Taped Seam style
- Meet ASTM F1670, ASTM F1671

**Level A Suits with Expanded Back**—Feature vapor-tight seams for a higher level of skin protection and an expanded back that can accommodate a self-contained breathing apparatus (SCBA). These one-piece garments are worn with a breathing apparatus and come with integrated faceshields, hoods, and include socks and gloves or glove liners making them fully encapsulated for protection from dust, gases, and splashes.

**Level A Suits with Expanded Back & Secondary Flame-Resistance**—These suits have the same features as Level A Suits with Expanded Back and add flame-resistant clothing that is worn over a base layer of personal flame-resistant clothing (such as shirts and pants) when there is an intermittent or low risk of encountering fire. These garments are not a primary source of flame protection.

## AlphaTec Breathable Chemical-Protective Clothing

Fabric provides protection for up to 70 chemicals and is breathable to help reduce heat stress. Garments are washable for long service life.

**Jackets**—Feature sealed seams and a double-front storm flap to help ensure protection from chemical spray. Have a heavy-duty zipper and hook-and-loop closures at the cuffs.

**Bibbed Overalls**—Garments have adjustable straps with parachute-style buckles and hook-and-loop closures at the cuffs.

**Coveralls**—Protect against arc flash, chemical splash, flash fire, and hot liquids. Feature sealed seams and a double-front storm flap to help ensure protection from chemical spray. Have a heavy-duty zipper and hook-and-loop closures at the cuffs.

## Microchem by AlphaTec Chemical Resistant Clothing

**4000 Series**—Provide an exceptional barrier against biological agents and organic and inorganic chemicals. Feature ultrasonically welded and taped seams for a strong liquid and particle barrier.

**2300 Series**—Protect against harmful chemicals and blood borne pathogens, while being lightweight and relatively strong and durable. Bound seams provide superior strength in a liquid and particle barrier.
