Hazardous Materials Overboots & Overshoes

Hazardous materials (hazmat) overboots meet NFPA 1991 (Edition 2016) specifications to protect first responders from hazardous materials such as nerve agents and extremely harsh and caustic chemicals. They are worn over existing footwear in chemical processing and when workers are exposed to corrosive chemicals and hazardous waste. **Latex rubber** stretches and resists tears and cuts. **PVC** is lighter than rubber.

Safety Criteria	Upper Material	Footwear Closure	Color	Pkg. Qty.	Brand	Item No.

Safety Toe Overshoes, Toe Caps & Metatarsal Guards

Safety-toe overshoes, toe caps, and metatarsal guards are worn over regular shoes or boots when protection is needed intermittently. **Safety toe caps** protect the front of the foot and top of the toes from damage caused by walking into obstacles. **Metatarsal guards** protect the top of the foot from light impact injuries, and **leg guards** protect the top of the foot and shin.
