

Men's 6" Safety Work Boots

■ All available in sizes between 7-14
Rubber outsole is abrasion-, slip- and oil-resistant.

Note: All styles are available in medium width; for wide widths and additional sizes, go to grainger.com/footwear

Style 1064A—Designed with lightweight, flexible cement construction, boots feature a microfiber leather upper, a mesh lining with antimicrobial treatment, a removable open cell polyurethane insole, an EVA midsole, and a fiberglass shank.

Style 26063—Features shaped alloy safety toes for lightweight protection and fit. Cement construction provides flexibility and reduced break-in time. Molded polyurethane midsole for lightweight, durable cushioning. Contoured open-cell polyurethane footbed has temperature-regulating technology sock cover to keep feet drier.

Style 40000—Abrasion-resistant leather upper with an external, hinged metatarsal guard for additional impact protection. Steel safety toes, steel shank, and contoured footbed provide support and comfort. Breathable, moisture-wicking lining with antimicrobial treatment to help reduce odor.

Style 47592—Premium full-grain leather upper for comfort and abrasion resistance. Breathable water-impermeable lining helps to keep feet dry in wet conditions. Mesh lining has antimicrobial treatment for odor control.

Style 52562—Antifatigue technology includes a contoured footbed, an antimicrobial mesh liner, and roomy toe to provide all-day comfort. Steel shank delivers structural support, and a puncture-resistant footplate provides flexible underfoot protection.

Style 65016—Waterproof leather upper with a padded collar above the ankles for comfort. Insulation keeps feet warm in cold environments with a breathable, moisture-wicking lining. Anti-fatigue polyurethane footbeds absorb shock and impact.

Style 85594—Leather work boot is designed with antifatigue technology for long hours in tough conditions. Features a contoured single-density open-cell polyurethane footbed with antimicrobial cover for breathability and odor control.

Style A172T—Full-grain leather upper with an external, hinged metatarsal guard for additional impact protection. Steel safety toes with external rubber toe covers and backstays increase durability. Anti-fatigue footbed and midsole, puncture-resistant plates, and heels designed to help grip ladder rungs. Breathable, moisture-wicking lining for all-day comfort.

Men's 6" Safety Work Boots

■ All available in sizes between 7-14
Nylon shank offers excellent structural support.

Note: All styles are available in medium and wide widths; for additional sizes and widths go to grainger.com/footwear

Style 04713—Steel-toe work boots feature resilient cushioning with lightweight, fatigue-fighting support. Additional features include a full-grain leather upper, a moisture-managing mesh lining, a removable, open cell, full cushion polyurethane footbed, a polyurethane midsole, and a rubber lug outsole.

Style 04714—Mesh-lined leather boots have a removable full-cushion footbed, and polyurethane midsole. Rubber lug outsole improves traction on wet and slippery surfaces.

Style 10304—Security-friendly boots feature a waterproof full-grain leather upper, EVA midsole with high-visibility reflective wrap, and rubber outsole.

Styles 10633 and 10694—Waterproof full-grain leather boots have a padded collar and a moisture-wicking mesh lining for comfort. Removable cushioned footbed and a rubber midsole. Non-slip rubber outsole provides traction on any terrain.
