Nitrile-Coated Gloves

- Fully coated
- For dry and light oil environments

Heavy-duty synthetic coating provides a dry grip, excellent grease and oil resistance, plus snag, cut, and puncture resistance. Comfortable contoured design. Cotton lining helps keep hands dry and comfortable.

Nitrile-Coated Gloves

- ¾ dipped
- For dry and light oil environments
- Meet EN 388 standard
- FDA accepted materials

Tough everyday work gloves resist abrasion, snags, and punctures with a soft lining that stays comfortable during extended tasks. 48GM42 lining is treated with Actifresh to resist bacterial buildup and odor.

Nitrile-Coated Gloves

- For dry and light oil environments

Easy Flex—Finger and palm coating lets the back of the hand breathe while protecting the working area. Gloves are snag-, cut-, and puncture-resistant. Nitrile coating repels oil and grease for a good grip. Gloves mold to the shape of the hand for a more relaxed, comfortable fit.

Hycron—Heavy-duty coating is a proprietary nitrile formulation that offers superior resistance to snags, abrasion, and punctures. Rugged gloves are stronger and more flexible than PVC and 3 times more durable than heavy-duty leather. Provide an excellent grease/oil barrier and will not degrade with time.

HyLite—Comfortable natural hand shape is easy to wear for a long workday. Proprietary nitrile coating is flexible, repels oil, and has good mechanical resistance to abrasion, cuts, punctures, and tears. This alternative to cotton, light leather, and PVC is silicone-free to help ensure metal sheets stay clean.

Hynit—Flexible gloves have a fully impregnated, proprietary nitrile coating that provides excellent abrasion resistance and repels oil, grease, and dirt. Slip-on cuff for easy on/off. D1504 has perforated back-of-hand.

Nitrile-Coated Gloves

J4454—Driver's style work gloves have abrasion-resistant nitrile coating on the palm and fingertips that wraps fully around the thumb for extra coverage. Cool, comfortable canvas back with shirred slip-on cuff.

J5044—NXG Series gloves have a 13-ga. nylon shell with ¾ coverage nitrile foam coating. Excellent comfort and fit with a firm wet and dry grip.

J5091 and J5093—Ninja BNF (Breathable nitrile foam) gloves have an 18-ga. nylon/spandex shell and are designed with unique BNF technology that allows glove to dissipate body heat, keeping hands cool and comfortable. NFT polymer coating provides exceptional abrasion resistance and strong grip. Treated with Actifresh to prevent bacteria buildup and odor. J5091 has an over-the-knuckle coating of flat nitrile and a second coating of BNF with NFT on the palm and fingertips. J5093 has a full coating of flat nitrile, with a second over-the-knuckle coating of BNF with NFT. Double coating provides durability and creates a waterproof barrier.
