Honeywell
MILLER

Honeywell Miller Safety Harnesses

- Meet ANSI standards
- Available in multiple sizes

650 and 850—Non-stretch lightweight polyester webbing prevents workers from slipping out of the harness during a fall. Feature pull-up or pull-down adjustment.

AirCore—Breathable, open-core padding provides optimal airflow and reduces heat and moisture build-up to keep workers cool and dry. Contoured ergonomic padding around the neck, lower back, and inner thighs reduces chafing and irritation. DuraFlex stretchable webbing provides enhanced flexibility and mobility.

DuraFlex—Lightweight stretchable webbing provides optimal mobility and comfort for all-day wear. Fully adjustable shoulder, chest, and leg straps.

DuraFlex Python—Feature cushioned tubular interwoven webbing in the upper torso, stretchable webbing in the lower torso, and non-stretch webbing leg straps to maintain the shape of the harness for easy donning and removal.

H100—Polyester webbing with five points of adjustment for a comfortable, secure fit. Plastic back pad/D-ring protector and fall indicator.

H500—Flexible polyester webbing offers greater freedom of movement and comfort around legs and shoulders. Pressure-relief breathable shoulder/back padding keeps workers dry and cool. SRL web link for easy attachment of personal SRLs. Belted models have foam waist pad for lumbar support.

H700—Polyester webbing with an ergonomic chest design for free upper body movement. Leg straps can be adjusted for various actions such as crouching, bending, etc. Multi-layered breathable padding disperses moisture to keep workers dry and cool. One-pull trauma relief strap provides quick pressure relief if a fall occurs.

Revolution—DualTech 2-sided, contrasting-color webbing has shape-retention memory. ErgoArmor back shield conforms to most body shapes, has a mesh membrane for air flow, keeps back D-ring in proper position, and minimizes impact from snap hooks and SRLs. PivotLink connection has a rotary design for increased mobility and provides attachment points for belts, tools, personal items, and accessories. Arc flash rated models have Kevlar/Nomex webbing that won't burn, melt, or conduct energy during an arc flash. Hot work models are made with Nomex/Kevlar blend webbing that resists heat and damage from flames and sparks.

Titan II—Lightweight with orange polyester webbing for high visibility. Non-slip back D-ring pad. Friction buckles allow easy torso adjustment.
