

Self-Retracting Lifelines

- Meet ANSI standards, except 425-lb. models

Provide fall arrest for work locations with distant anchorage points and/or limited clear fall distances.

Compact SRLs—Lightweight, rugged devices are offered in 6-, 9-, and 10-ft. lengths with a choice of leg-end connectors in steel or aluminum. 6-ft. models feature external energy absorbers in one- and two-leg versions. 9- and 10-ft. models feature internal inertial brake system.

Contractor SRLs—Feature swivel-action load-indicating carabiner for back D-ring connection and an integral carriage/attachment handle. Heavyweight 425-lb. models meet OSHA 1926.502.

Contractor SRL LE (Leading Edge)—Designed to reduce the risk of cable failure when contacting an edge during a fall event.

Self-Retracting Lifelines

- Meet ANSI and CSA standards

Quick-activating braking system stops free falls, providing a safe and quick rescue. Steel connectors with 3600-lb. gate strength. No annual factory recertification required.

Black Rhino™—Small, lightweight housing holds corrosion-resistant stainless steel and aluminum components. Withstands harsh environments.

MightyLite™—Durable, corrosion-resistant stainless steel and aluminum housing. Install overhead; great for hard-to-mount locations.

MightyLite™ LE—Arrestors feature integrated shock-absorbing packs designed for leading edge (LE) applications. Rated for up to a 310-lb. user in LE applications and up to a 400-lb. user when mounted overhead. Models with Kevlar® packs are for use in LE welding applications.

Falcon™—Ultra-durable units have impact-resistant nylon housing with stainless steel and aluminum components.

Falcon™ Edge—Up to 30% lighter than similar models to help ease installation and reduce worker fatigue. 420H88 to 420H90 have an integrated shock absorber with a flame retardant cover that resists weld splatter in welding applications.

DuraSeal™—All units come with a cable sling with carabiner (not shown). The cable sling can be used as the primary anchorage connector for carabiner mounted units. It can also be used as a secondary anchorage that can be attached to the handle of the unit.
