

Fall Protection Kits

- Meet ANSI standards
- 5-pt. harnesses

All kits include a full-body safety harness and a lanyard or lifeline.

Kits without anchors are for applications where secure anchor points are already in place.

Kits with reusable roofing anchors include an anchor that mounts to the peak of a pitched roof to provide a secure anchor point for attaching a lifeline or lanyard.

Kits with temporary pass-through anchors include an anchor that wraps around an overhead structural support, such as a beam or brace, to create a secure anchor point for attaching a lifeline or lanyard. Pass-through anchors self-tighten when downward force is applied.

Weight Cap.	Kit Components	Harness Type	Harness Sizing	D-Ring Locations	Buckles* (Chest/Leg)	Item No.

Fall Protection Kits

- Meet ANSI standards
- For general fall arrest
- Universal size

All kits include a full-body safety harness, a shock-absorbing lanyard, and a storage bag or container.

Kits without anchors are for applications where secure anchor points are already in place.

Kits with reusable roofing anchors include an anchor that mounts on a flat or pitched roof to provide a secure anchor point for attaching a lifeline or lanyard.

Kits with temporary pass-through anchors include a cross-arm anchorage connector. The cross-arm strap wraps around an overhead structural support such as a beam or brace, and has a D-ring and loop to create a secure anchor point for attaching a lifeline or lanyard.

Weight Cap.	Kit Components	D-Ring Locations	Buckles* (Chest/Leg)	Item No.
