

Guardrail Systems

Create a physical barrier between workers and fall hazards and alert workers to the presence of a hazard. Guardrails are typically installed around the perimeter of a roof, opening, or other hazard.

| Overall LxH | Mid-Rail Height | Fold-Down Capable | Color & Finish | For Use With | Material | Installation Type | Item No. |

Warning Lines

Warning lines have brightly colored flags to indicate an edge or a hazard and are typically installed six or more feet from a fall hazard when other fall protection is not used.
