## Electrical Arc Flash Protective Headwear

Scan. Order. Done.  
Details on page A1.

### Arc Flash & Flame-Resistant Headwear

• Meet NFPA 70E standards

Provide protection for the head and neck from burns that can occur when working near electrical hazards.

**Balaclavas** provide 360° coverage around the head and neck and cover gaps around the collar. Usually worn under headwear and in conjunction with eye and face protection.

**Liner** fits close to the head and can be worn under a hard hat to protect the head, ears, and neck while leaving the face uncovered.

**Beanies and Knit hats** absorb sweat and keep the head and ears warm.

### Arc Flash & Flame-Resistant Faceshields

• Meet NFPA 70E standards

Protect worker's head and face from burns while providing clear visibility to work area and surroundings.

**Faceshields** surround the face and extend slightly under the chin. 458P09 and 458P11 have a transparent chin.

**Head Protection Kits** include hard hats with an integrated visor to protect workers from arc flash and impacts to the head. The visor flips up to provide unobstructed vision when protection is not required.

### Arc Flash & Flame-Resistant Hoods

• Meet NFPA 70E standards

Protect worker's head, face, and neck from burns that can occur when working near electrical hazards. Hoods provide 360° protection and have a built-in faceshield.

**Lift Front** hoods have a faceshield that can be tilted up so workers don't have

to remove the entire hood. 56PH78 and 56PG65 include a flashlight kit.

**Standard** hoods cover the head and face with a transparent faceshield for clear visibility.

**Ventilated** hoods have an integrated system that provides airflow to reduce heat stress.
