

ANSI/ISEA Z308.1-2015 Standard for First Aid Kits

The new standard introduces two classes of first aid kits, Class A and Class B. The kits class B—Designed to be equipped with supplies to deal Class A and Class B. The kits (I, II, III). Each type is intended with injuries encountered in to address the needs of the work environments where they are used.

common workplace injuries. more complex or high-risk environments.

488G87

Class A—Designed for the most Type I: Intended for use in stationary, indoor applications where kit contents have minimal potential for damage. These kits are not intended to be portable and should have a means for mounting in a fixed position.

Type II: Intended for portable use in indoor applications where the potential for damage to kit supplies due to environmental factors and rough handling is minimal.

Type III: Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage of kit supplies due to environment is not probable. These kits should have the means to be mounted in a fixed position and have a water-resistant seal.

Class A First Aid Kits
