

Back Stripe Pattern Options

U-Back - Has two vertical stripes and at least one horizontal stripe of reflective tape on the back of the vest

X-Back - Reflective tapes cross the back of the vest in an X pattern. Indicates a worker is facing away and can't see signals or oncoming traffic

Chevron - Inverted V-shape pattern provides enhanced worker visibility especially in low-light conditions

Vertical - Has two parallel reflective vertical stripes down the back and front of vest

None - Has no reflective stripes

Safety Vest ANSI Classification

ANSI types are based on the work environment and the activities being performed.

Type O - Off-Road

Type R - Roadway and traffic control

Type P - Public Safety

Performance classes specify the amount and design of visible and reflective material in the garment. For further information, see Quick Tip #153: High-Visibility Clothing Standards at grainger.com/quicktips.

PERFORMANCE CLASS 1 (TYPE O)

Offers the minimum amount of high-visibility material to enhance the visibility and conspicuity of workers in off-road environments.

PERFORMANCE CLASS 2 (TYPE R OR P)

Provides additional amounts of high-visibility and reflective materials that allow for better definition of the human form. Considered the minimum level of protection for workers exposed to roadway rights-of-way and TTC (temporary traffic control) zones.

PERFORMANCE CLASS 3 (TYPE R OR P)

Provides greater level of high-visibility and reflective material to make the wearer more visible in both complex backgrounds and through a full range of movement. A garment or vest without sleeves worn alone is not considered Class 3 protection.

ANSI-Rated High-Visibility Vests

Available in sizes from S to 5XL at Grainger.com

High-visibility fabric and reflective tape increases safety for workers on roadways, in traffic, and in public safety settings.

Class 3 vests have short sleeves with reflective stripes to maximize worker visibility.
