Floor-Mount Eyewash Stations

■ Meet ANSI Z358.1

Floor-mount eyewash stations connect to a plumbed water source.**Hazardous location freeze-resistant heat-trace floor-mount stations** meet NFPA 70 NEC standards for use in hazardous locations. Heat-trace elements wrap around pipes and connect to a power source to keep water temperatures above freezing so water flows freely. Minimum operating temperature is -4°F. Hardwired electrical connection. Hazardous location rating of Class I/Division 2.

Counter-Mount Eyewash Stations

- For general purpose environments
- Meet ANSI Z358.1

Stations connect to an under-counter water supply line and have a single activation handle that stays on until turned off. They're often used in labs and medical facilities.

| Activation | Counter Mount Location | Pipe Material | Inlet Connection | Barrier Free | Series | Brand | Item No. |
|--------------------------------|------------------------|---------------------|-------------------|--------------|------------|----------|----------|
