Drench Hose Eyewash Stations

- For general purpose environments
 - Meet ANSI Z358.1
- Station hoses have a handle with spouts that have the spray pattern required for effective eye and face wash. A mount holds it secure for use as an ANSI-compliant eyewash. The sprayer can be removed from the mount to rinse other parts of the body. They activate using one hand and stay on until turned off. Connect to a plumbed water supply.

Portable Safety Showers with Eyewash Stations

- Meet ANSI Z358.1

Showers flush harmful chemicals and contaminants from the skin and eyes. They have a tank that holds potable water so they don't need to be connected to a plumbed water source.

Heated gravity-fed shower has an integrated eyewash station and a heated tank that prevents water from freezing. Hardwired electrical connection. 120 V AC voltage.

Pressurized shower with integrated eyewash attaches to a water-filled pressurized tank that delivers water to rinse and flush contaminants.

Supplemental Eyewash Bottles & Stations

Items are used in non-critical situations to flush dirt, dust, and other nuisance irritants from the eyes. They serve as a temporary solution to complement ANSI-compliant eyewash installations.

Bottle stations hold eyewash bottles to keep them visible and readily available for workers.

Bottles hold liquids to flush irritants out of the eyes.

Bottle holders are placed around a facility to keep supplemental eyewash bottles easy to access.

Drench hoses connect to a water source.

Faucet-mount eyewash stations attach to a standard faucet.

Wall-mount **gravity-fed portable eyewash stations** have tanks that are pre-filled with solution or clean, potable water and doesn't require a plumbed water source. Cartridges are replaced when needed and are not refillable.

Pressurized portable eyewash stations attach a pressurized tank that delivers water to flush the eyes. Includes a drench hose.

Pressurized portable safety showers have an integrated eyewash station and attach a pressurized tank that delivers water to the body and eyes.
