Tyvek 800 J Chemical-Resistant Protective Clothing

- CE Category III Type 3-B, 4-B, 5-B, and 6-B; require additional taping for liquid-tightness

Garments combine freedom of movement, durability, and protection. They resist pressurized jets of low-concentration, water-based inorganic chemicals. Proprietary fabric is designed to offer chemical, liquid, and oil protection in very humid applications. Elastic around the face and a self-adhesive chin flap help make a tight seal around a full-face respirator.

►CHOOSE: Size	Color	Mfr. Model	Item No.	Pkg. Qty.

Chemical-Resistant Protective Coveralls

Provide puncture- and tear-resistant protection in wet or dry applications without restricting movement.

Tychem 2000—Provide protection from light chemical splash and biohazards. Made from polyethylene-coated DuPont Tyvek.

Tychem 4000—Provide protection against a wide range of chemicals. Made from DuPont Tyvek fabric with Saranex 23-P lamination construction.

Tychem 2000 SFR—Protects against a range of chemicals and also provides secondary flame resistance when worn over FR garments like those made with DuPont Nomex.

Chemical-Resistant Protective Clothing

- ISO 6350 Liquid Chemical Penetration Test

ChemSplash 1 apparel provides a barrier against chemical exposure due to accidental liquid splash. Layered fabric with microporous layer lets heat and sweat vapor escape while protecting against dry particulates and liquids.
