Rope Grabs, Lifelines, and Carabiners

• Meet ANSI standards

Rope Grabs—For vertical applications. 30HG85 hinged design allows quick placement anywhere along vertical lifeline connector. 45J304 and 45J303 can easily be threaded onto lifeline ropes with unbraided trailing ends.

Lifelines—Increase vertical mobility. Include double-locking snap hook and taped end.

Carabiners—Self-locking link between lifelines, lanyards, and an anchorage point. Constructed of zinc-plated alloy steel.

Rope Grabs, Lifelines and Carabiners

• Meet ANSI standards, except Rope Lifelines

Rope Grabs—Stainless steel rope grabs move easily along lifelines to provide continuous fall protection. 3KN17 enables hands-free operation.

Rope Lifelines—Used with Miller rope grabs or roof anchor kit (see page 1778).

Carabiners—Double-action twist-lock anchorage connectors are made of lightweight aluminum.

Anchorage Connectors

• Meet OSHA and ANSI standards

Pass-Thru Anchors—Smaller D-ring passes through larger D-ring to attach to structural member; can be passed through multiple times to adjust overhead height.

Roof Anchors—Permanent and reusable anchors are designed for fall protection during maintenance, repair, and construction on pitched and flat roofs.

Mounted D-Ring and D-Bolt Anchors—Provide economical fall protection anchorage for installation on structural steel members, in a variety of work environments. D-rings are zinc-plated, except 45J296 is stainless steel.

Concrete Anchors—Temporary, reusable anchors can be relocated repeatedly. Engineered for use in cured, existing concrete.

Beam Anchor and Toggle Anchor—Easy-to-install anchors can be relocated and reused.

Clamp-on Beam Anchor anchor is well-suited for fixed positions. Heavy-duty aluminum alloy construction.

Toggle Anchor can be mounted horizontally or vertically; toggle action secures it in place on the beam. Heavy-duty alloy steel construction.
