Ep Minerals

These powdered or granulated materials absorb oils, acids, paints, inks, water, and other liquids when sprinkled over spills. They clean up spills on floors and uneven or cracked surfaces to minimize the risk of falls. Once liquids are absorbed, the material can be swept up. **Food Grade Loose Absorbent**—NSF J1 certified for use in food production facilities.

Oil-Only Sorbent Pads

■ Polypropylene material

Absorb and clean up oil-based liquids while repelling water. Flat pads fit under equipment, on top of workbenches, in aisles and walkways to clean up incidental spills such as transformer oil, vehicle fluids, grease, petroleum, and other oil-based solvents. Water-repellency makes them suitable for outdoor use. White color draws attention to machine leaks and shows saturation level during spill response. The coverstock layer on some pads increases durability and reduces linting.
