

Personal Fall Limiter

- Meets ANSI standards
 - Capacity: 310 lb.
- Helps reduce total fall and deceleration distance. Steel frame with PVC cover. 2" W webbing with snap hook and swiveling carabiner. Features internal braking system.

SRL Length	Item No.
8 ft.	19F393

Retractable Webbing Lanyard

Compact design keeps webbing retracted and out of the way. Brakes instantly to limit free falls. Swivel shackle prevents twisting. Includes carabiner for attaching to anchor point.

Personal Fall Limiters and Cab-Mount Bracket

- Meet ANSI and CSA standards

PERSONAL FALL LIMITERS (PFLs)

Self-retracting lanyards with polyester webbing and quick-activating brake systems eliminate the need for extended fall distance clearance. 6-ft. working length is suitable for most applications; 9-ft. length is great for scaffolding and order picker applications; 11-ft. length offers maximum mobility. Harness connectors have 3600-lb. gate strength unless noted as 5K (5000 lb.). Connectors are made of steel unless noted as aluminum.

MiniLite™—Lightweight stainless steel interior components with high-impact thermoplastic housing.

Scorpion™—Can be attached directly to the harness D-ring for use as a personal fall limiter or as a traditional lifeline.

Turbo T-BAK™ Retractable Tie-Back—All-in-1 design with anchorage connector reduces the amount of equipment required on a jobsite.

TurboLite™—Impact-resistant nylon housing is compact and lightweight. Unit attaches directly to harness back D-ring for increased mobility.

Twin Turbo™ Systems—Allow 2 TurboLite or Turbo T-BAK tie-back retractable PFLs to be connected to a single harness for 100% tie-off fall protection. Systems with D-ring connector easily attach to noncoated metallic back D-rings. Systems with lightweight G2 connector attach to harness webbing below the D-ring, leaving it open for other equipment. G2 Connector Kit and components are available separately. 49U980 includes 1 each of 49U981, 49U982, and 49U983.
