

Plastic IBC Spill Containment Pallets

- Support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance
- Black grate color

IBC (Intermediate Bulk Container) spill containment pallets hold and store IBC containers and are much larger than regular spill pallets to accommodate the higher volume of liquid found in IBC containers. They have a sump to capture liquids in the event a container on the pallet leaks or spills.

Nestable Plastic IBC Spill Pallets—Can be stacked to save space. Pallets can be moved with a forklift once they are stacked.

Double Stack Plastic IBC Spill Pallets—Allow users to stack pallets to maximize storage.

Modular Plastic IBC Spill Pallets—Can be connected to share capacity. The shared capacity allows these pallets to have a lower profile and smaller footprint than standard IBC spill pallets.

Note: Products do not include any pictured containers.

Covered Plastic IBC Spill Containment Pallets

- Support EPA Compliance 40 CFR 264.175
- Support SPCC and NPDES Compliance
- For outdoor use
- Black grate color

Covered IBC (Intermediate Bulk Container) spill pallets are used outdoors to protect contents from the elements or in areas where unauthorized access is a concern. These covered pallets with a sump contain liquids in the event an IBC container on the pallet leaks or spills. These pallets are larger than regular spill pallets to accommodate the volume of IBC containers, and are typically moved with a forklift.

Hardcover Plastic IBC Spill Pallets with Rolltop and Double Doors—Hold and store drums, tanks, totes, and other containers. The roll-top and double doors allow easy loading and unloading of drums.

Modular Hardcover Plastic IBC Spill Pallets with Rolltop and Double Doors—Can also be connected together to share capacity. The shared capacity allows these pallets to have a lower profile and smaller footprint than standard IBC spill pallets.

Softcover Plastic IBC Spill Pallets—Are chemical-resistant. Their extra wide platform shelf accommodates IBC units up to 50 in square.
