

Shock-Absorbing Lanyards

▪ Meet ANSI standards

EZ-Stop™—Lightweight and compact modular design reduces the overall cost of ownership by allowing individual components to be purchased and replaced separately as needed.

EZ-Stop™ Tie-Back 46W446 and 46W447—Single-leg tie-back web has a snap hook at one end and tie-back hook at the other.

EZ-Stop™ Retrax™—Adjustable spring technology retracts lanyard automatically to fit the working area.

EZ-Stop™ III—Tubular webbing integrates the shock-absorbing core. Stretches instead of tearing when subjected to fall-arrest forces.

ShockWave2™—Expand and contract to user's movements to minimize tripping and entanglements.

ShockWave2™ Tie-Back 425Y89—Include the same features as the ShockWave2 with the added versatility of a tie-back to eliminate the need for a separate anchorage connector.

Harness Extension and Positioning/Restraint Devices

▪ Meet ANSI and OSHA standards

Extension hooks to back of harness for self-retracting lifelines and lanyards. Positioning and restraint devices attach to harnesses that include side D-rings to allow hands-free work. Positioning Assembly provides support for workers on vertical surfaces.
