

Dewatering Bags

- Support EPA Compliance 40 CFR 122.26

Bags attach to the discharge hose on a dewatering pump to filter contaminants such as sediment and pollutants from water that is being drained from ditches, ponds, construction sites, and similar areas. Accommodate up to a 4 in discharge hose.

Drain Plugs & Kits

- Polyurethane plug material
- Metal handles

Plugs fit snugly into drain openings to prevent spilled liquids from entering the drain. They can be used for short term or left in place as an alternative to permanently sealing the drain. Tapered sides make it easier to seat the plug and ensure a secure fit. **Drain Plug Kits** include (1) each of the 2 in, 3 in and 4 in dia conical drain plugs and (1) plastic case.

Drain Cover Seals & Storage Cases

Attach to storm drains to prevent spilled liquids, oils, and hazardous materials from entering the drain. Flexible material allows the seal to conform to irregularities in the drain. Covers are used in areas at risk of spills or in washdown applications. All seals can be washed and reused. Self-sealing models are UV-resistant.

Magnetic Drain Cover Seals have a magnetic backing that seals the cover to a storm drain grate.

Self-Sealing Drain Cover Seals have a bottom layer that seals the area around the grate to prevent liquids from entering the drain.

Drive-Over Self-Sealing Drain Cover Seals are made of heavy duty materials that withstand damage caused by vehicle traffic.

Wall-Mount Storage Cases for indicated Ultratech seals hold and keep them at hand to prevent damage during storage and transport.

Filter Socks

Socks prevent contaminated water and debris from reaching storm drains. They are placed in front of or around the drain to filter contaminants from water before it reaches the grate. Water flows through the filter while trapping silt and other contaminants.
