

## Confined-Space Fans, Blowers, and Accessories

Designed for positive and negative ventilation.

**Plastic Axial Fans**—Lightweight and quiet. Constructed of durable polyethylene with a built-in handle. Fans that include a canister assembly attach to the intake or exhaust side of a blower. Fans with explosionproof motors meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. Fans with DC motor include power cord with battery clips.

**Steel Axial Fans**—Steel construction with handle for easy transport. 4UDK1, 3PAK4, and 3PAK5 meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. 32MZ58 meets Class I, Div. I and II, Groups B, C, & D and Class II, Div. I and II, Groups F & G.

**Steel Axial Fan Air Bags**—All-in-one portable axial fan system built into a heavy-duty polyester bag. Zippered ends allow blower to be used without removing unit from the bag.

**Plastic Centrifugal Blowers**—Polyethylene construction with a built-in handle and 8" flange on intake and exhaust ports. 5GVU5 and 5GVU6 are UL Recognized, CSA Certified.

**Ducting**—Retractable with wire-reinforced design. Cuffs on both sides ease attachment. Conductive ducting prevents static buildup in hazardous locations.

**Manhole Ventilation Systems**—Low-profile manhole air vent, 90° elbow, and built-in mounting all in 1 unit. Include collapsible duct for easy entry, stored in a small storage bag. Ducting is vinyl and polyester with PVC coating. Systems are compact, lightweight, and not statically conductive. Made from linear low-density polyethylene.

**Confined-Space Accessories**—Individual components to help design a system to address specific needs.

## Confined-Space Ventilation Kits

Kits include blower, 6 and 15 ft. of ducting with storage bag, and Manhole Ventilation System 5GVY1.
